## Low Power Single Operational Amplifier

### Description

LM321 is a low power, wide power range performance operational amplifier; The static current is only 430  $\mu$ A per amplifier (5V) with high unit gain frequency and A voltage swing rate of 0.4V/ $\mu$ s. Input common mode circuit includes ground, so the device can operate in single - and dual-power applications. It can also comfortably drive large capacity loads.
