## **MORNSUN®**

30W, AC-DC converter

#### **FEATURES**

- Universal 85-264VAC or 100-370VDC input voltage
- 3×2 inch high power density
- Operating ambient temperature range: -25℃ ~ +70℃
- Output short circuit, over-current, over-voltage protection
- High efficiency, high reliability
- Regulated output, low output ripple & noise
- EMI performance meets CISPR32 / EN55032 CLASS B
- EN62368 safety approval

LO30-10Bxx series is one of Mornsun's compact size power converter. It features universal AC input and at the same time accepts DC input voltage, low power consumption, high efficiency, high reliability, reinforced isolation. It offers good EMC performance compliant to IEC/EN61000-4 and CISPR32/EN55032 and meets IEC/EN/UL62368, EN/UL60335 standards. The converters are widely used in industrial, office and civil applications. For extremely harsh EMC environment, we recommend using the application circuit show in Design Reference of this datasheet.

### Product Characteristic Curve

Note: ① With an AC input between 85-140VAC and a DC input between 100-200VDC, the output power must be derated as per temperature derating curves; ② This product is suitable for applications using natural air cooling; for applications in closed environment please consult factory or one of our FAE.

#### Output Filter Components:

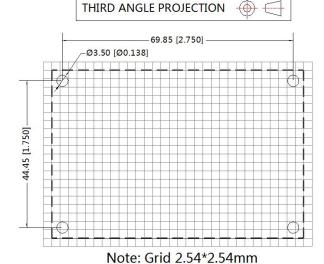

We recommend using an electrolytic capacitor with high frequency, and low ESR rating for C2 (refer to manufacture's datasheet). Choose a Capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C1 is a ceramic capacitor used for filtering high-frequency noise and TVS is a recommended suppressor diode to protect the application in case of a converter failure.

2. For additional information please refer to application notes on www.mornsun-power.com.
