

# 0.5W PLCC-2 Package Top View Hyper Red LED Technical Data Sheet

Series No.: R5730VC-V1H-Q15

Spec No.: R5730 Rev No.: V.3 Date: Jul./05/2010 Page: 1 OF 9 Approved: 3400 Checked: Wu Drawn: Li

Lucky Light Electronics Co., Ltd.

## Features:

- ♦ PLCC-2 Package.
- ♦ High Power LED type.
- ♦ Very long operating life.
- ♦ Instant light (less than 100ns).
- Designed for high current operation.
- ♦ Low thermal resistance.
- ♦ High reliable.
- ♦ The product itself will remain within RoHS complaint Version.

## Descriptions:

- ♦ The series is specially designed for applications requiring higher brightness.
- ♦ The LED lamps are available with different colors, intensities.
- ♦ Utilizing advanced Silicon Chip-Carrier (SiC) chip technology.

# Applications:

- ♦ Reading lights (car, bus, aircraft).
- ◇ Portable (flashlight, bicycle).
- ♦ Mini\_ accent/Up lighters/Down lighters/Orientation.
- ♦ Bollards/Security/Garden.
- ♦ Cove/Under shelf/Task.
- ♦ Automotive rear combination lamps.
- ♦ Traffic signaling/Beacons/ Rail crossing and Wayside.
- ♦ Indoor/Outdoor Commercial and Residential Architectural.
- ♦ Edge\_ lit signs (Exit, point of sale).
- ♦ LCD Backlights/Light Guides.

#### Notes:

- 1. Luminous Intensity (Flux) Measurement allowance is  $\pm$  10%.
- 2.  $\theta$ 1/2 is the off-axis angle at which the luminous intensity is half the axial luminous intensity.
- 3. It use many parameters that correspond to the CIE 1931 2°. X, Y, and Z are CIE 1931 2° values of Red, Green and Blue content of the measurement.

## Please read the following notes before using the product:

#### 1. Over-current-proof

Customer must apply resistors for protection, otherwise slight voltage shift will cause big current change (Burn out will happen).

## 2. Storage

- 2.1 Do not open moisture proof bag before the products are ready to use.
- 2.2 Before opening the package, the LEDs should be kept at  $30^{\circ}$ C or less and  $80^{\circ}$ RH or less.
- 2.3 The LEDs should be used within a year.
- 2.4 After opening the package, the LEDs should be kept at  $30^{\circ}$ C or less and 60%RH or less.
- 2.5 The LEDs should be used within 168 hours (7 days) after opening the package.
- 2.6 If the moisture adsorbent material has fabled away or the LEDs have exceeded the storage time, baking treatment should be performed using the following conditions. Baking treatment:  $60\pm5^{\circ}$  for 24 hours.

## 3. Soldering Condition

When soldering, for Lamp without stopper type and must be leave a minimum of 3mm clearance from the base of the lens to the soldering point.

To avoided the Epoxy climb up on lead frame and was impact to non-soldering problem, dipping the lens into the solder must be avoided.

Do not apply any external stress to the lead frame during soldering while the LED is at high temperature.

Recommended soldering conditions:

| Soldering Iron |                            | Wave Soldering |              |  |
|----------------|----------------------------|----------------|--------------|--|
| Temperature    | 300℃ Max.                  | Pre-heat       | 100°C Max.   |  |
| Soldering Time | Soldering Time 3 sec. Max. |                | 60 sec. Max. |  |
|                | (one time only)            | Solder Wave    | 260°C Max.   |  |
|                |                            | Soldering Time | 5 sec. Max.  |  |

Note: Excessive soldering temperature and / or time might result in deformation of the LED lens or catastrophic failure of the LED.

#### 4. Soldering Iron

Each terminal is to go to the tip of soldering iron temperature less than 260°C for 5 seconds within once in less than the soldering iron capacity 25W. Leave two seconds and more intervals, and do soldering of each terminal. Be careful because the damage of the product is often started at the time of the hand solder.

## 5. Repairing

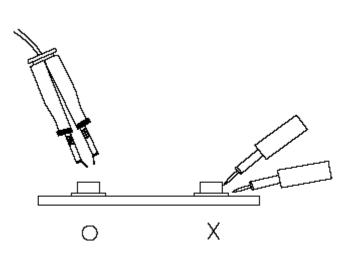

Repair should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-head soldering iron should be used (as below figure). It should be confirmed beforehand whether the characteristics of the LEDs will or will not be damaged by repairing.

Spec No.: R5730 Rev No.: V.3 Date: Jul./05/2010 Page: 8 OF 9

Approved: 3400 Checked: Wu Drawn: Li

Lucky Light Electronics Co., Ltd. http://www.luckylightled.com

## 6. Caution in ESD

Static Electricity and surge damages the LED. It is recommended to use a wrist band or anti-electrostatic glove when handling the LED. All devices, equipment and machinery must be properly grounded.
