

FEATURES

1. Protects Circuit from excess current

The short circuit protection function prevents the continued flow of short current. After short current is detected, load current is monitored, and if the load returns to normal, the relay returns to normal operation.

2. No need for fuses, polyswitches, or other protectors

The built-in short circuit protection function eliminates the need for overcurrent protectors, reducing mounting costs and space requirements.

3. High capacity

Can control up to 0.5A (60 VDC) load current.

TYPICAL APPLICATIONS

- Industrial equipment
- Traffic signal control
- Security equipment

TYPES

Type	I/O isolation voltage	Output rating*		Part No.				Packing quantity	
				Through hole terminal	Surface-mount terminal		Tube		
		Load voltage	Load current		Tube packing style			Tape and reel packing style	
DC type	1,500 V	60 V	500 mA	AQV112KL	AQV112KLA	Picked from the 1/2/3-pin side	Picked from the 4/5/6-pin side	1 tube contains 50 pcs. 1 batch contains 500 pcs.	1,000 pcs.

What is short circuit protection Non-latch type?

If the load current reaches a predetermined overcurrent level, the output-side short circuit protection function cuts off the load current. It then monitors the load current, and if it returns to normal, automatically recovers to normal relay operation.

In order to operate the short circuit protection function, ensure that the input current is at least $I_F = 10 \text{ mA}$.
