HFKM/HFKS

AUTOMOTIVE RELAY

Typical Applications

Flasher control, Indicator control, Power door & windows, Low temperature start, Immobilizers, Central door lock, Sunproof motor control

Features

- Switching capability up to 20A
- Six different contact arrangements
- Open and sealed types available
- Two terminals size for HFKM & HFKS
- RoHS & ELV compliant (555)

CHARACTERISTICS

Contact arrangement	1A, 1B, 1C, 1W, 1U, 1V					
	Typ.: 100mV (at 10A)					
Voltage drop (initial) 1)	Max.: 250mV (at 10A)					
	1A:60A					
	1B:12A					
	1C(NO/NC): 60/12A					
Max. make current 2)	1U: Resistive/Inductive: 2×40A					
	Lamp: 2×60A (AgSnO ₂)					
	1V:2×8A					
	1W(NO/NC):2×30A/2×5A					
Max. switching voltage	75VDC					
	1A: 20A, 1B: 10A					
	1C(NO/NC): 20A/10A					
	1U:Resistive, Inductive: 2×20A					
Max. switching current	Lamp: 2×6A (AgSnO ₂)					
	1V: 2×7A					
	1W(NO/NC): 2×15A/2×5A					
Max. switching power	200W					
	1A:15A, 1B:10A					
Continuous surrent	1C(NO/NC):15A/10A					
Continuous current	1U:2×10A, 1V: 2×7A					
	1W(NO/NC): 2×7A/2×5A					

Min. contact load	0.5A 6VDC					
Electrical life	See "CONTACT DATA" table					
Mechanical life	1 x 10 ⁷ ops 300ops/mir					
Initial insulation resistance	100MΩ (500VDC)					
D: 1 4: 4 #	500VAC (1min, leakage					
Dielectric strength	current less than 1mA)					
Operate time	Max.: 3ms (at nomi. vol.)					
Release time	Max.: 1.5ms ³⁾					
Coil max. allowable temp.	155°C					
Ambient temperature	-40°C to +85°C					
Storage temperature	-40°C to +155°C					
Vibration resistance	10Hz to 55Hz 1.5mm DA					
Shock resistance	Acceleration10g (11ms)					
Termination	PCB 4)					
Construction	Sealed IP67 & Open					
I lait wai abt	Open: Approx. 8g					
Unit weight	Sealed: Approx.12g					

- 1) Equivalent to the max. initial contact resistance is $100m\Omega$ (at 1A 6VDC).
- 2) Max. make current is the max. shock current of lamp load.
- 3) The value is measured when voltage drops suddenly from nominal voltage to 0 VDC and coil is not paralleled with suppression circuit.
- Since it is an environmental friendly product, please select lead-free solder when welding. The recommended soldering temperature is 240°C to 260°C.

- 1) AgSnO2 contact is suitable for the lamp load, inductive load and motor load, while AgNi contact is suitable for resistive load;
- 2) When it is utilized in flasher, a special AgSnO₂ contact material should be used and the ordering key should be 170 as a special suffix. Please connect by the polarity according to the diagrams below.
- 3) The load wiring diagrams are listed below. When special AgSnO2 contacts are applied, please heed the anode and cathode's request when wired.

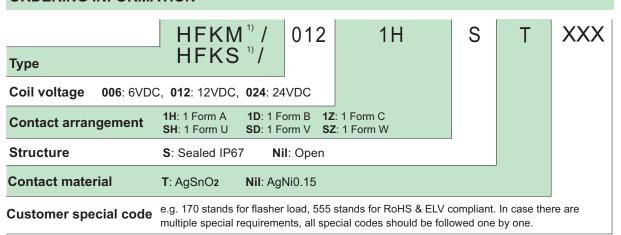

4) When the load requirement is different from content of the table above, please contact Hongfa for relay application support.

¹⁾ Max. allowable overdrive voltage is stated with 10A load applied.

ORDERING INFORMATION

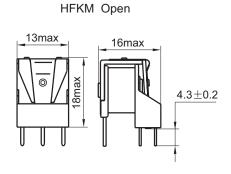

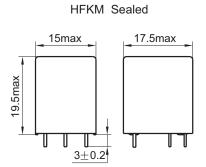

¹⁾ HFKM/HFKS is an environmental friendly product, please mark special code (555) when order.

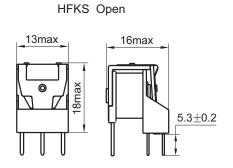

OUTLINE DIMENSIONS, WIRING DIAGRAM AND PC BOARD LAYOUT

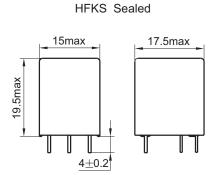

Unit: mm

Outline Dimensions

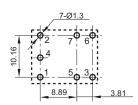

OUTLINE DIMENSIONS, WIRING DIAGRAM AND PC BOARD LAYOUT

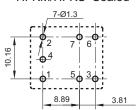

Unit: mm

PCB Layout

HFKM/HFKS Open

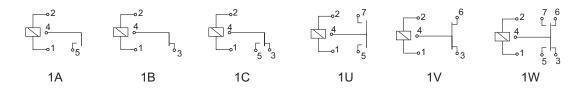

HFKM/HFKS Sealed

Remark: 1) In case of no tolerance shown in outline dimension: outline dimension ≤1mm, tolerance should be ±0.2mm; outline dimension >1mm and ≤5mm, tolerance should be ±0.3mm; outline dimension >5mm, tolerance should be ±0.4mm.

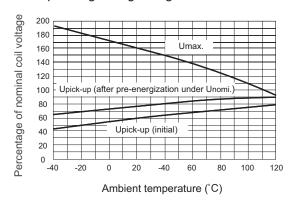

2) The tolerance without indicating for PCB mounting holes is always ±0.1mm.

Wiring Diagram (Bottom view)

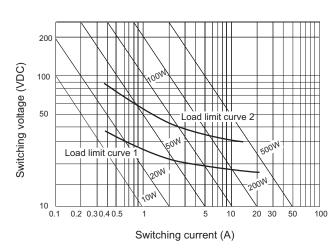

CHARACTERISTIC CURVES

1. Coil operating voltage range

- 1) The operating voltage is connected with coil preenergized time and voltage. After pre-energized, the operating voltage will increase.
- 2) The maximum allowable coil temperature is 155°C. For the coil temperature rise which is measured by resistance is average value, we recommend the coil temperature should be below 130°C under the different application ambient, different coil voltage and different load etc.
- If the actual operating coil voltage is out of the specified range, please contact Hongfa for further details.

2. Load limit curve

- The load and electrical life tests are made according to "CONTACT DATA" parameters' table. If actual load voltage, current, or operate frequency is different from "CONTACT DATA" table, please arrange corresponding tests for confirmation.
- 2) Load limit curve 1: arc extinguishes, during transit time (change over contact).
- 3) Load limit curve 2: safe shutdown, no stationary arc (make contact)

CHARACTERISTIC CURVES

3. Application examples 1)

Symbol	Relay type	Load type	On/Off ratio	Test temperature (°C)	Test time (h)
1	HFKM/012-1HST	Lamp: 3×21W	15s : 15s	70 40	80 320
2	HFKM/012-1HST	Lamp: 6×21W	15s : 15s	40	100
3	HFKM/012-SHST	Lamp: 2×10W Lamp: 3×15W	20s : 2s	40 40	500 500
4	HFKM/012-1ZST	Lamp: 2×21W	30s : 30s	85	850
5	HFKM/012-SHT (170)	Lamp: 2×21W+1×5W	500ms : 500ms	85	450

¹⁾ The actual capabilities of the relay can be higher than the example parameters.

Disclaimer

This datasheet is for the customers' reference. All the specifications are subject to change without notice.

We could not evaluate all the performance and all the parameters for every possible application. Thus the user should be in a right position to choose the suitable product for their own application. If there is any query, please contact Hongfa for the technical service. However, it is the user's responsibility to determine which product should be used only.
