

General Description

The AOZ6135 is a high performance single-pole double-throw (SPDT), low power, TTL-compatible bus switch.

The AOZ6135 can handle analog and digital signals. Signals with voltages up to V_{CC} (1.65V to 5.5V) can be transmitted in either direction.

When the Select pin is LOW, B_0 is connected to the output A pin. When the Select pin is HIGH, B_1 is connected to the output A pin. The path that is open will have a high-impedance state with respect to the output. Break-before-make is guaranteed.

Features

- SC-70 6-Lead Package
- 1.65V to 5.5V V_{CC} operation
- 1Ω connection between ports
- Break-before-make switching
